

CATO PLUS WITH EXTRA COMFORT

Cato is the versatile all rounder by Kloeber that promotes healthy seated posture within the office.

The new Cato Plus features ample seat and back upholstery for enhanced seated comfort. The choice of backrest in mesh or upholstery ensures clients can customise their seating to suit all aesthetics.

- | Patented automatic lever ensures optimum adaptation to individual weight categories and body sizes.
- | Dynamic sitting increases the oxygen supply to the muscles helping to improve concentration at work.
- | Upright sitting without curvature of the back is healthier.

Design: Klöber Design-Team

KLÖBER 

Mesh backrest

(cpn88, cpn89,
cpn98, cpn99)

Upholstered backrest

(cpl97, cpl98,
cpl99)

3D mesh, also with upholstered pad backrest, for optimum spinal support.

Plastic shell upholstered.

Height-adjustable and retrofittable.

Depth adjustable.

Backrest height adjustable. Adapts quickly and easily for people of different heights.

Coat hanger to match the design Retrofittable (mesh backrest).

Neck support supports the neck muscles, cpn88, cpn89, cpn98, cpn99 can be retrofitted.

Backrest variants.

Lumbar support, optional. Supports the lumbar region and ensures that the backrest fits snugly to the user's back.

Point-synchro mechanism. Prevents a harmful, inflexible posture. Automatic dynamic sitting with a finely-tuned balance between forward and backward movement.

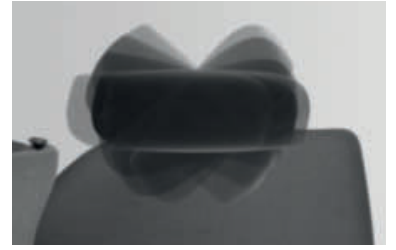

4F arm supports. Four functions: height-adjustable by 11 cm and horizontally adjustable by 5 cm forwards. Each armrest is width-adjustable **without tools** by 2.5 (+3) cm and swivels by 30° to the left/right.

MF arm supports. Multifunctional: height-adjustable by 11.5 cm and horizontally adjustable by 8 cm forwards. Each armrest is width-adjustable **without tools** by 5 (+3) cm and swivels by 30° to the left/right. It can be locked in the selected position.

NEW: 3D arm supports Adjustment in three dimensions: **height-adjustable** by 10 cm, with scaling. Armrest can be rotated inwards and outwards in two stages to 15° and 30°. Can **rotate freely through 360°** beyond a point of resistance. 5 cm **depth adjustment range**. The depth adjustment changes by 1.5 cm forward or backward and the clear width between the armrests changes by 2 cm for each 180° turn. Arm supports also adjustable by approx. 3 cm **in width without tools**. Optional: gel armrest for pleasant soft-touch effect, promotes optimum pressure distribution for the lower arms.

Seat tilt. This avoids a hunched posture and ensures upright sitting.

Sliding seat, optional. Seat depth can be adjusted forwards to suit individual leg lengths. Avoids pressure against the thighs from the front edge of the seat.

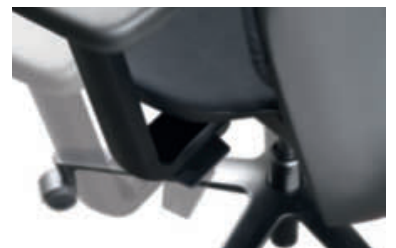

Automatic lever. Patented adjustment of the backrest counter-pressure against the body weight. In seconds – for automatic dynamic sitting.

NEW: height-adjustable armrests. The height can be adjusted by 10 cm, with scaling. The armrest is made of polypropylene. The armrests are width-adjustable by approx. 3 cm **without tools**.

Z-armrests. Adjustable by 10 cm in height and 2.5 cm in depth forwards. **Armrest width adjustment without tools, optional.**

For model with **tool-free armrest width adjustment** see technical data sheet.
