PERFORMANCE TEST Executive Chair

The FACTS assessment system

The Editors award swivel chairs that score the most points in the technology and equipment, as well as price and seating comfort category, the overall rating "very good" or "good".

TECHNOLOGY / EQUIPMENT

30 PER CENT / 150 POINTS: FACTS has assessed the chairs in accordance with a variety of different criteria, ranging from the different warranty periods for the product or the gas lift suspension, the adjustable seat depth and seat tilt or backrest lock, to the mechanical deep suspension. It also tested the ergonomics. The Editors awarded further points for the ability to exchange upholstery and cover fabric, as well as for the workmanship with high-quality materials. If the chair does not have a vertically adjustable backrest, points were also awarded for an adjustable lumbar support, or one which is available at an additional charge, since this can enhance seating comfort considerably.

PRICE

10 PER CENT / 50 POINTS: the assessment is related directly to price and does not take account of the performance of the chair. It is based on the recommended retail price of the supplier, excluding VAT. However, experience tells us that the actual market prices are lower.

SEATING COMFORT

60 PER CENT / 300 POINTS: a group of employees from the publishing company tested the comfort while seated. As always, the first time the test person sat in the chair represented a familiarisation with its functions and operation. Once the test persons had selected the correct seat height, they tried out the various settings and locking mechanisms while working at a desk. The various options, such as sitting with locked backrest or dynamic sitting, as well as adjustment of the seat depth or tilt, were then assessed, where applicable. The personal response to the comfort of the upholstery is also reflected in the score.

OVERALL ASSESSMENT: a total of 500 points can be awarded. 150 points for technology and equipment, 50 points for the price and 300 points for the seating comfort.

400 – 500 points	=	very good
300 – 399 points	=	good
200 – 299 points	=	fair
100 – 199 points	=	satisfactory
Less than 99 points	=	poor

The best executive chairs:

Only the chairs that score top marks in the technology and equipment, as well as price and seating comfort categories, are awarded the "very good" FACTS rating.
